

Hi,

Last week, just out of the kiln, the fairies were like crazy! A nice surprise awaited us when we woke up. The white coat had lit up the landscape long before the sun.

It's a good thing we got up early ... and didn't go to school 😊

Did it snow at your place too?

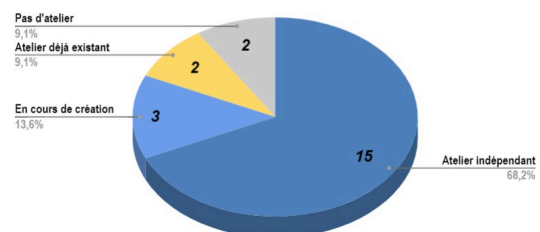

About our former students

excellent job insertion statistics !

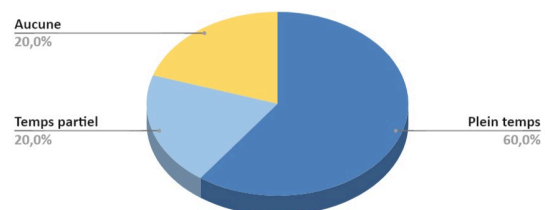

Most of our students want to set up their own independent studio. Several factors are essential to make this a really happen. First, learning a high degree of technical skill. Our teaching also focuses on developing the individual creativity of each student.

Finally, during and after their training, each student receives individual support for their project.

Création d'atelier 1 année après la formation
années 2021 à 2023

Activité céramique des élèves 1 an après la formation
année 2023

We're proud and happy - our studio creation statistics are excellent!

Well done, and welcome to the new small business leaders club!

>> Last days for trainings with 2024 rates <<

There's still time to sign up for the 2025 courses before the rates go up.

On 31 December it will be too late!

Behind this newsletter and at the head of the School is one person: it's me, Ariane Coissieux.

Once again this year, I've been privileged to receive positive feedback on my work as a ceramist: a prize in Taiwan for a teapot, an article in the Revue de la Céramique et du Verre, a work selected for the Ceramics Biennial in Bursa (Turkey)

I'll tell you about it from time to time ...

Meanwhile, I wish you
a wonderful Christmas
time ...

and may the fairies be
with you!

See you soon for more adventures ...
